

Optimizing outdoor activities by reducing tick exposure!

Organic Tick Control

Pesticide applications using **low-toxicity** chemicals reduce the risk of over-exposure. IPM Act dictates that our “low impact”, **25B exempt** formula evades the need to notify parents and reduces IPM coordinator paperwork. Although not required, we provide work orders and follow a standard IPM plan.

School Ground Evaluations

We provide...

- **Evaluations** every application
- Thorough and repeated inspections to identify areas of high risk
- Strategies and **recommendations** to reduce tick activity beyond a pesticide treatment

Tick Education Handouts

Including...

- A comprehensive map of school grounds that outlines high-risk areas
- Interactive, age-appropriate student handouts
- Faculty handouts to **arm teachers with the knowledge to protect their students**

Kid- and pet-friendly

Pollinator-friendly

OMRI and NOP approved

(Licensed and fully insured in NJ and PA)
